Art Unit: 3634

1. Applicant's election of Species I in the reply filed on March 8, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Accordingly, claims 10,21-27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species.

2. Claims 1-9,11-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis for the following:

Claim 1, line 6 "said spacer";

Claim 1, line 25 "inter-structural attachments";

Claim 14, lines 9-10 "inter-structural attachments";

Claim 19, line 3 "the hold down tabs".

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3634

Claims 1,2,4,9,11,13,14 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Foster et al. Foster et al disclose a pressure vent hurricane shutter comprising a shutter framework encompassing slat support guides and cover 16a,b; 18a,b; 20a,b; 12, 14, slanted slats 22, shutter hinge 42.

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 3,5,6,12,15,16,20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Foster et al. Regarding the type of material used, it is a well settled issue that the selection of a known material based upon its suitability for the intended use would have been obvious to one of ordinary skill in the art. With respect to the dimensions of the shutter, inasmuch as there is nothing to indicate that the recited dimensions are significant or are anything more than one of numerous configurations a person of ordinary skill in the art would have found obvious for the purpose of controlling the strength characteristics of the shutter no patentable weight has been attributed thereto.

5. Claims 7,17,19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Foster et al in view of Sipos et al. While Foster et al do not disclose the use of hold down tabs, Sipos et al disclose a hurricane shutter comprising hold down tabs 60, wherein, to incorporate this teaching into the hurricane shutter of Foster et al for their

Application/Control Number: 10/647,673 Page 4

Art Unit: 3634

explicit purpose of maintaining the shutter in a predetermined position would have been

obvious to one of ordinary skill in the art.

6. Claims 8,18 would be allowable if rewritten to overcome the rejection(s) under 35

U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the

limitations of the base claim and any intervening claims.

7. The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure. Sassano, Iacovoni, Economou, Milam et al, Ney, Poma et al,

Schoen, Berg, Ensminger.

8. Any inquiry concerning this communication should be directed to David M Purol

at telephone number (571) 272-6833.
